Bosham Sofa Set Care Instructions

There is no assembly for this item except layout out the modular base pieces to create your corner sofa.

This design is made from Polywood planks riveted together and secured onto a rust proof aluminium frame.

This polywood is a plastic based wood effect material and is extremely hardwearing and durable, making it a very practical weatherproof option for outdoor garden products. It has been stained to create a more natural colour and the only risk comes from scratching the panels with any sharp instrument which will cause permanent marking to the polywood. Should this happen the best treatment is to lightly sand down the localised area with a gentle sand paper and re-stain with a similar coloured furniture wax to try and hide the marking.

Both the polywood structure and linen effect fabric are designed not to fade in the sun or be damaged by a light shower. We recommend storing all garden furniture away from the English elements over the Winter months to help prolong the life of these products. Simply give them a wipe down or gentle hose clean at the start of the Summer.

The cushions provided with the chairs are made from showerproof spun polyester with a more linen like appearance and come with foam inners and will survive a shower but should not be left out in prolonged wet weather. The design of the foam inners allow the water to drain through quickly but we would always recommend keeping the cushions in the dry wherever possible.

We strongly recommend wiping localised staining and sponge cleaning the cushion where possible, as machine washing will remove some of the showerproof coating added to this fabric. The covers are removable and can be washed if necessary on a low 30 degree wash - please do not wash in higher temperatures to avoid shrinking or distorting the cover.
