

Installation

- Please read through these instructions carefully before installation
 - This fitting is IP65 rated for outdoor use 

Extra Information

1. Once these instructions have been correctly carried out, the mains can be re-connected and the fitting will be ready for use
2. Please keep these instructions available for future use
3. We recommend cleaning with a soft dry cloth. Don't use abrasive materials, this may affect the finish and therefore void the warranty
4. Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice.

Household Circuit Information

Household Circuit	Connects to	Fitting Wire Colour
Blue or Black (Neutral)	>	Neutral 'N'

Brown or Red – Switched Live	>	Live 'L'

Check that...

- You have correctly identified the house wires
 - The connections are tight
- No loose strands have been left out of the connection block

Safety Information for lights that require wiring in:

1. It is recommended that this fitting is installed by a qualified electrician.
2. The fitting should be fitted in accordance with current UK Buildings and Wiring Regulations.
3. Before attempting installation or maintenance, ensure the power is switched off at the mains power switch. Ensure other persons cannot restore the electricity supply without your knowledge.
 4. If in doubt, please consult a qualified electrician.
5. To avoid damage to concealed wiring during installation, establish the direction of the supply cable before drilling fixing holes.
6. Extra holes should not be drilled into the back plate as this may cause it to crack and break under pressure.
7. This fitting should be fitted to a lighting supply with a protected 5-amp fuse or equivalent circuit breaker.
 8. Only one wire should thread through the rubber end of the terminal block enclosure.
9. Always be sure to use the correct type and wattage of bulb as indicated on the fitting (and stated above).
 10. Do not exceed the maximum wattage stated on the fitting.
11. Using the incorrect bulb or wattage may cause damage to the light and therefore void the warranty.
12. When changing the bulb, ensure the mains power supply is switched off and allow the old bulb to cool before handling. Dispose of bulbs carefully.

Devonport Down Light - Brass Installation Instructions

Please read through these instructions and ensure they are kept for future reference.
Please note, this fitting is not supplied with a bulb.

Bulb required: 1 x LED E27 Max 10W GLS Bulb

This product has been manufactured from solid raw brass and does not have any lacquer or sealing coat. Therefore, the finish will naturally dull and darken with time and may eventually display the brass patina known as Verdigris which is green.

This natural aging process was the intention for this product. However, you may wish to retain a more polished brass appearance and this can be achieved by occasionally applying a good quality metal polish or wadding e.g. "Brasso" etc and buffing off for a bright, shiny brass finish.
